SAVE CUSTOMERS TIME & MONEY

LESS STAINING ... MORE ENJOYING

DesignWood color is part of the pressure-treating process

A Finished Project From The Start

- The DesignWood colorant* is pressure impregnated with the preservatives, giving color and protection in one step.
- Eliminates the need for initial staining, saving time and money.
- Ideal for decks, fencing railings, steps, gazebos, playground equipment, trellis, lattice, structural framing, and every outdoor living space.
- Preserve improves the durability of exterior wood for sustainable building; field-tested & proven-to-last.

Proven ACQ Product Performance

- Proven protection for wood products in Canada since 2002.
- Preserve® pressure treated wood products are produced to the Canadian Standards Association (CSA) standards as specified in the National Building Code of Canada for residential and commercial applications.
- Utilizes the world’s most widely used form of copper preservative.
- Green Certified Product for Resource Efficiency

Color shown in photo may differ from actual product. * DesignWood Colorant may vary slightly depending on location, species of wood, age, grain pattern and heartwood content.
DesignWood

A Finished Project from the Start

DesignWood Color is part of the pressure-treating process.

Residential Use & Homeowner Projects
- Decks, Porches, Arbors, Gazebos, Fences, Walkways & Retaining Walls
- Raised Beds, Planter Boxes, Outdoor Furniture, Picnic Tables & Play Sets

Commercial Project Use
- Sill Plates, Furring Strips, Shakes & Shingles
- Piling*, Piers*, Boardwalks, Bridges* & Permanent Wood Foundations
- Structural Columns, Sign Posts, Utility Poles, Building Poles & Guardrails

Agricultural Use
- Tomato & Grapevine stakes and Livestock Fencing
- Post Frame Structures, Pole Barns, Stables & Corrals

Specifications and Approvals
Preserve® Pressure-Treated Lumber and Plywood

Accepted and Standardized Preservative of
The Canadian Standards Association (CSA) as specified in the National Building Code of Canada.

- **CSA Use Categories**
  - Above Ground Use: UC1, UC2, UC3.2
  - Ground Contact Use: UC4.1* & UC4.2*

Viance provides 3-part model specifications at [www.TreatedWood.com](http://www.TreatedWood.com)

Nails, Fasteners and Connectors
For the best results, the use of building-code approved, corrosion-resistant fasteners and connectors is always recommended for all exterior wood projects.

- Direct contact of Preserve treated wood with aluminum products is not recommended.
- Hot-dipped galvanized fasteners (meeting ASTM A 153) and connectors (ASTM A 653 Class G185 sheet), or better, are recommended.

For Permanent Wood Foundations and corrosive environments, such as areas with saltwater spray, stainless steel fasteners are recommended.

Safe Practices When Working With Pressure-Treated Wood
- Wear gloves when working with wood.
- Wear a dust mask when machining any wood to reduce the inhalation of wood dusts.
- Wear appropriate eye protection to reduce the potential for eye injury from wood particles and flying debris during machining.
- Wash hands thoroughly with mild soap and water after working with treated wood.
- All sawdust and debris should be cleaned up and disposed of after construction in accordance with local waste management regulations.
- Do not burn pressure-treated wood.
- Wash work clothes separately from other household clothing before reuse.
- Pressure-treated wood should not be used where it may come into direct or indirect contact with drinking water, except for uses involving incidental contact such as fresh water docks and bridges.
- Do not use pressure-treated wood in circumstances where the preservative may become a component of food, animal feed or beehives.
- Do not use pressure-treated wood for mulch.
- Treated wood may be disposed of in landfills or burned in commercial or industrial incinerators or boilers in accordance with national, provincial and local regulations.

* Applies to ACQ 202

Preserve® is a NAHB Home Innovation Research Labs Green Certified Product for Resource Efficiency and is eligible to contribute points toward a building certification under the National Green Building Standard™. See our Preserve® product listings on [www.GreenApprovedProducts.com](http://www.GreenApprovedProducts.com) for more information.

Preserve® treated wood products are produced by independently owned and operated pressure treating wood facilities. *See Preserve® Lifetime Limited Warranty at Treatedwood.com.
