**Section 1 - IDENTIFICATION**

**Product Identifier:**
TimberSaver® Borate treated wood

**Recommended Use:**
Lumber

**Restrictions on Use:**
None known

**Manufacturer Information:**
Call Viance at 800.421.8661 for the wood treater nearest your location.

**General Comments:**
NOTE: Emergency telephone numbers are to be used only in the event of chemical emergencies involving a spill, leak, fire, exposure, or accident involving chemicals. All non-emergency questions should be directed to customer service.

**Section 2 - HAZARD(S) IDENTIFICATION**

**Classification in accordance with 29 CFR 1910.1200.**
- Carcinogen, Category 2
- Serious eye damage/irritation, Category 2
- Reproductive Toxicity, Category 2
- Skin sensitizer, Category 1B
- Respiratory Sensitizer, Category 1B
- Specific Target Organ Toxicity - Single Exposure, Category 3 (respiratory system)

**GHS LABEL ELEMENTS**

**Symbol(s):**

![symbol]

**Signal Word:**
WARNING

**Hazard Statement(s):**
- Suspected of causing cancer
- Causes serious eye irritation
- May cause an allergic skin reaction
May cause respiratory irritation.
Suspected of damaging fertility or the unborn child.
May cause allergy or asthma symptoms or breathing difficulties if inhaled

Precautionary Statement(s)
Prevention
Obtain special instructions before use. Do not breathe dust. Use only outdoors or in a well-ventilated area. Contaminated work clothing should not be allowed out of the workplace. Wear protective gloves/clothing and eye/face protection. Wash thoroughly after handling. Do not eat, drink, or smoke when using this product. Avoid release to the environment.

Response
IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. IF ON SKIN (or hair): Remove/take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical advice/attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Call a POISON CENTER or doctor/physician if you feel unwell.

Storage
Store locked up.

Disposal
Dispose in accordance with all applicable regulations.

Hazard(s) Not Otherwise Classified
Combustible solid. Dust may form explosive mixtures with air. Wood dust is a potential health problem when wood particles from processes such as sanding, drilling, machining, and cutting become airborne. Inhalation of these particles may cause allergic respiratory symptoms, mucosal and non-allergic respiratory symptoms, and cancer.

Component Related Regulatory Information
This product may be regulated, have exposure limits or other information identified as the following: Wood dust, all soft and hard woods, Wood dusts-soft woods, Wood dusts-hard wood.

Component Information/Information on Non-Hazardous Components
Timbersaver treated wood products are made up of >99% "wood" and <1% Disodium octaborate tetrahydrate.

This product is considered hazardous under the criteria specified in 29 CFR 1910.1200 (Hazard Communication Standard) and the Canadian Workplace Hazardous Materials Information System (WHMIS).
**Section 4 - FIRST-AID MEASURES**

**Inhalation**

If inhaled: If dusts are inhaled, remove person to fresh air. If not breathing, give artificial respiration. If breathing is difficult, have trained personnel give oxygen to the victim; Seek medical attention.

**Skin Contact**

If wood splinters are injected under the skin, get medical attention immediately. If on skin (or hair):

Remove/take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical advice/attention.

**Eye Contact**

If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation occurs: Get medical advice/attention.

**Ingestion**

If swallowed: Rinse mouth. Do NOT induce vomiting. Call a POISON CENTER or doctor/physician if you feel unwell.

**Most Important Symptoms/Effects**

**Acute**

Eye irritation, allergic skin reaction,

**Delayed**

Respiratory ailments.

**Indication of Immediate Medical Attention and Special Treatment Needed, If Needed**

Respiratory ailments and pre-existing skin conditions may be aggravated by exposure to wood dust.

**Section 5 - FIRE-FIGHTING MEASURES**

**Suitable Extinguishing Media**

Use regular dry chemical, carbon dioxide, water spray, or regular foam. Use water to wet down wood and to reduce the likelihood of ignition or dispersion of dust into the air.

Large fires: water spray or fog, alcohol-resistant foam

**Unsuitable Extinguishing Media**

Do not scatter spilled material with high-pressure water streams.

**Specific Hazards Arising from the Chemical**

Combustible solid. Dust may form explosive mixtures with air.

**Hazardous Decomposition Products**

Combustion: aldehydes, carbon monoxide, carbon dioxide, and organic acids.

**Special Protective Equipment and Precautions for Firefighters**

Wood is combustible and dusts may form explosive mixtures with air in the presence of an ignition source. Wear full protective fire-fighting gear including self-contained breathing apparatus (SCBA) for protection against possible exposure.

**Fire Fighting Measures**

Move container from fire area if it can be done without risk. Dike for later disposal. Cool containers with water spray until well after the fire is out. Withdraw immediately in case of rising sound from venting safety device. Keep unnecessary people away, isolate hazard area and deny entry. Avoid inhalation of material or combustion by-products. Stay upwind and keep out of low areas.
**Section 6 - ACCIDENTAL RELEASE MEASURES**

**Personal Precautions, Protective Equipment and Emergency Procedures**

No containment procedures are needed, as this product cannot spill or leak the preservative. Keep away from sparks and flame.

**Methods and Materials for Containment and Cleaning Up**

Wear appropriate protective equipment and clothing during clean-up. Wet down accumulated dusts prior to sweeping or vacuuming in order to prevent explosion hazards. Sweep up or vacuum small pieces and dusts and place in appropriate container for disposal. Gather larger pieces by an appropriate method. Avoid the generation of airborne dusts during clean-up. Do not inhale dusts during cleanup.

**Section 7 - HANDLING AND STORAGE**

**Precautions for Safe Handling**

Do not generate airborne dusts in the presence of an ignition source when sawing, cutting or grinding wood. Wash hands after handling and before eating. Avoid contact of wood dusts with skin and eyes. Do not breathe wood dusts. Do not eat, drink or smoke when handling this material or in areas where dusts of this product are present. When handling treated wood, wear washable or disposable coveralls or long-sleeved shirt and long pants, chemical resistant gloves, and socks plus industrial grade safety boots with chemical resistant soles. Contaminated clothing should be removed and laundered before reuse.

**Conditions for Safe Storage, including any Incompatibilities**

Maintain good housekeeping procedures, such as sweeping regularly to avoid accumulation of dusts. Store product in a dry area away from excessive heat, sparks and open flame. Store in a well-ventilated place. Keep container tightly closed. Store locked up.

**Section 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION**

Safety Data Sheet

TimberSaver PT Pressure Treated Wood

Quebec: 5 mg/m³ TWA (total dust, except red cedar, containing no asbestos and less than 1% crystalline silica) (related to Wood dust, all soft and hard woods)
Saskatchewan: 5 mg/m³ TWA (certain species) (related to Wood dusts-soft woods)
10 mg/m³ STEL (related to Wood dusts-soft woods)
Yukon: 5 mg/m³ TWA (non-allergic); 2.5 mg/m³ TWA (allergenic, including cedar, mahogany, teak) (related to Wood dust, all soft and hard woods)
10 mg/m³ STEL (non-allergic); 5 mg/m³ STEL (allergenic, including cedar, mahogany, teak) (related to Wood dust, all soft and hard woods)

Appropriate Engineering Controls
Use exhaust ventilation when cutting, grinding or sanding in enclosed areas and if it is anticipated the exposure limits for wood dust may be exceeded during working with this product. Ventilation equipment should be explosion-resistant if explosive concentrations of material are present. Provide local exhaust or process enclosure ventilation system. Ensure compliance with applicable exposure limits.

Personal Protective Equipment

Eyes/Face Protection
Wear safety glasses with side shields when handling, cutting, sanding or grinding this material. Use a face shield during processes that may generate excessive dusts and splinters. Provide an emergency eye wash fountain in the immediate work area.

Skin Protection
Wear puncture resistant work gloves, such as leather.

Respiratory Protection
If ventilation is not sufficient to effectively prevent buildup of aerosols, mists, or dust, appropriate NIOSH respiratory protection must be provided. Respirators should be selected by and used under the direction of a trained health and safety professional following regulatory requirements found in OSHA’s respirator standard (29 CFR 1910.134) and ANSI's standard for respiratory protection (Z88.2-1992). A written respiratory protection program, including provisions for medical certification, training, fit testing, exposure assessments, maintenance, inspection, cleaning, and convenient, sanitary storage must be implemented.

**Section 10 - STABILITY AND REACTIVITY**

**Chemical Stability**
This is a stable material.

**Possibility of Hazardous Reactions**
Hazardous polymerization will not occur.

**Conditions to Avoid**
Keep away from excessive heat, sparks and open flame. Keep away from incompatible materials.

**Incompatible Materials**
Strong oxidizing agents (peroxides, chlorine, strong acids) and drying oils.

**Hazardous Decomposition Products**
Hazardous decomposition products include irritating and toxic fumes and gases of carbon monoxide, carbon dioxide, aldehydes, and organic acids.

**Section 11 - TOXICOLOGICAL INFORMATION**

**Acute Toxicity**
Wood dusts may be irritating to the eyes, skin and respiratory tract. Prolonged or repeated inhalation of wood dust may cause respiratory irritation, recurrent bronchitis and prolonged colds. Depending on the species of wood, recurrent exposure may cause allergic skin and respiratory reactions in some individuals.

**Component Analysis - LD50/LC50**
No LD50/LC50's are available for this product's components.

**Information on Likely Routes of Exposure**

**Inhalation**
May cause respiratory tract irritation.

**Ingestion**
May be harmful if swallowed.

**Skin Contact**
May be harmful in contact with skin. May cause an allergic skin reaction.

**Eye Contact**
May cause eye irritation.

**Immediate Effects**
Allergic skin reaction, respiratory system damage

**Delayed Effects**
Causes damage to organs through prolonged or repeated exposure. Respiratory ailments.

**Medical Conditions Aggravated by Exposure**
Pre-existing eye, respiratory system and skin conditions.

**Irritation/Corrosivity Data**
Respiratory tract irritation, skin irritation, eye irritation
Safety Data Sheet

TimberSaver PT Pressure Treated

SDS ID: VIA-240

Wood Respiratory Sensitization
No data available.

Dermal Sensitization
May cause an allergic skin reaction.

Germ Cell Mutagenicity
No data available for the mixture.

Carcinogenicity

Component Carcinogenicity
Borate treated wood and its components are not listed as carcinogens by ACGIH, NIOSH, or IARC. Wood dust is classified as a human carcinogen or occupational carcinogen by ACGIH, NIOSH, and IARC. This classification is based on an increased incidence of nasal and paranasal cancers in people exposed to wood dusts.

Component Carcinogenicity
Wood/Wood dust (Not Available)
- ACGIH: A1 - Confirmed Human Carcinogen (related to Wood dusts-hard wood)
- NIOSH: potential occupational carcinogen (related to Wood dust, all soft and hard woods)
- NTP: Known Human Carcinogen (related to Wood dust, all soft and hard woods) (Select Carcinogen)
- IARC: Monograph 62 [1995] (related to Wood dust, all soft and hard woods) (Group 1 (carcinogenic to humans))

Reproductive Toxicity
No information available for the product.

Specific Target Organ Toxicity - Single Exposure
May cause respiratory system irritation.

Specific Target Organ Toxicity - Repeated Exposure
No information available for the product.

Aspiration Hazard
Not expected to be an aspiration hazard.

*** Section 12 - ECOLOGICAL INFORMATION***

Ecotoxicity
This product is not expected to leach harmful amounts of preservative into the environment. The wood preservative, Timbersaver, is an inorganic sodium borate salt. The boron contained in this preservative may be harmful to some plants and animals in excessive concentrations.

Component Analysis - Aquatic Toxicity
No ecotoxicity data are available for this product's components.

Persistence and Degradability
No information available for the product.

Bioaccumulation Potential
No information available for the product.
Disposal Methods
Dispose of waste material according to Local, State, Federal, and Provincial Environmental Regulations.

Disposal of Contaminated Packaging

Component Waste Numbers
The U.S. EPA has not published waste numbers for this product's components.

** Section 14 - TRANSPORT INFORMATION**

** Section 15 - REGULATORY INFORMATION**

U.S. Federal Regulations
All components are on the U.S. EPA TSCA Inventory List. This product is pressure treated with small amounts of a FIFRA registered wood preservative which falls under Environmental Protection Agency regulations. Disodium octaborate tetrahydrate is registered with the EPA under registration number 64405-8.

U.S. Federal Regulations
None of this product's components are listed under SARA Section 302 (40 CFR 355 Appendix A), SARA Section 313 (40 CFR 372.65), or CERCLA (40 CFR 302.4).

SARA 311/312:  Acute Health Yes; Chronic Yes; Fire Yes; Pressure No; Reactive No

Federal Insecticide, Fungicide, and Rodenticide Act
This material contains the following chemicals present on either the Listing of Pesticide Chemicals (40 CFR 180) or Pesticides Classified for Restricted Use as listed by FIFRA:

Disodium octaborate tetrahydrate (12280-03-4)

FIFRA Section number 180.1121 (Boric Acid And Its Salts)

The following statement is provided under the California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65): WARNING! Drilling, sawing, sanding, or machining wood products generate wood dust and other substances known to the state of California to cause cancer.

Other state regulations may apply. Check individual state requirements

Canadian WHMIS Ingredient Disclosure List (IDL)
Components of this material have been checked against the Canadian WHMIS Ingredients Disclosure List. The List is composed of chemicals which must be identified on SDSs if they are included in products which fall under WHMIS criteria specified in the Controlled Products Regulations and present above the threshold limits listed on the IDL. No components are listed in the WHMIS IDL.
